Indian Journal of Electronic & Tele Communications Engineering

Volume 2, Number 2 (2014)

Contents

- Understanding the Effects of Scaling in case of a High Speed and Low resolution ADC through Simulation** 85-92
Baljit Singh¹ and Parveen Kumar²
- Converting Resolver Interface to Incremental Encoder Interface** 93-96
Ilapakurty Ravi and Dr. K. Nagabhushan Raju
- Minimum Normalized Transmit Rate Based Fair Scheduling Algorithm in Orthogonal Frequency Division Multiplexing (OFDM)** 97-104
1Sangeeta Monga and 2Sukhdev Singh
- Histogram Characterizations of Infrared Images Captured By a Modified Digital Camera** 105-112
**S. Ratna Sulistiyanti, *F.X. Arinto Setyawan and **Adhi Susanto*
- Performance Analysis of Edge Detection Methods on Hexagonal Sampling Grid** 113-128
1P. Vidya, 2S. Veni and 3K.A. Narayanankutty
- Genetic Algorithm Based Decentralized Controller for Load-Frequency Control of Interconnected Power Systems with RFB Considering TCPS in the Tie-Line** 129-142
1A. Chidambaram and 2B. Paramasivam
- Optical Sensor Based Instrument for Correlative Analysis of Human EEG and Breathing Signal** 143-154
M. Sundararajan
- Effects of Overdrive, Frequency, Sample and Error in Code Transition Levels on Computation of ENOB of an A/D Converter** 155-164
1S. Gamad and D. K. Mishra*
